Durometer Test Stand

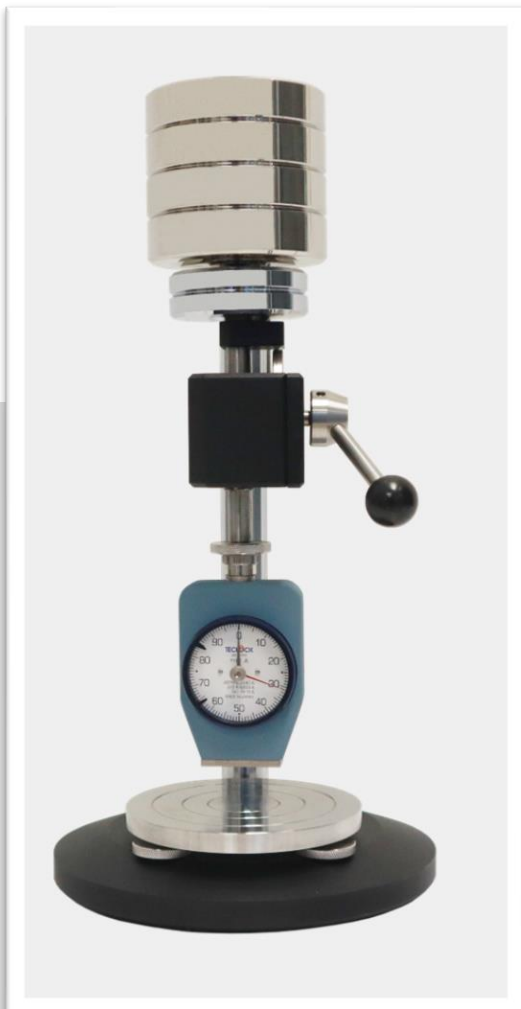

DRM The DRM Series Operating Stand is the ideal tool for repetitive or lab-type testing for users who must test either large specimens, or test in a number of different durometer scales.

The DRM Operating Stand, used in conjunction with a durometer eliminates the operator error sometimes associated with shop floor durometer testing.

The stand features a floating pin and includes the proper load weights required for testing in durometer scales, Each durometer of type A,E,B,O and SRIS with fixing around 1 kg weight and type D,DO,C with fix around 5 kg, as noted in ASTM D2240, ISO,JIS

DRM-A

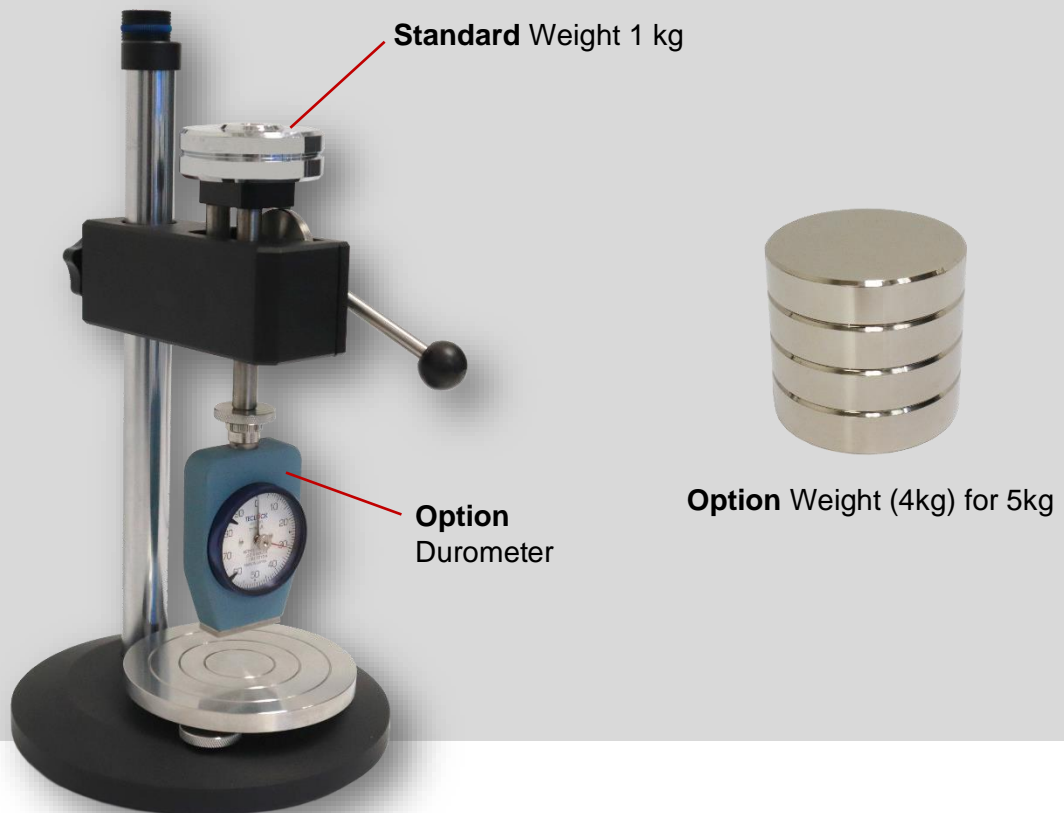

DRM-D

Specification

DRM-A with fixing around 1 kg weight
DRM-D with fixing around 5 kg weight
Adjusted glass stage

These equipment can help us test the hardness more acutely

Durometer Test Stand

Features

Used in the durometer of type A, type B or type O, type OO directly.

Specification

Operating Type : Indentor to specimen

Loading Method : Cam loading

Loading Stroke : 18 mm

Specimen Thickness : 60 mm

Throat Depth : 65 mm

Support Table (dia.) : 116 mm

Lifting Adjustment : Screw adjustment

Table Adjustment : Three-point leveling

Net Weight : 5.6kg(excluding S weight)

Package Weight : 7.6kg(excluding D weight)

Dimension
